

Blue Moon Professional Snooker Equipment

To Operate

The Blue Moon Professional snooker table equipment is very easy and quick to use. Simply give the blue operating sleeve a quarter turn to the right to loosen it, pull the shaft to the required length and then tighten by turning the blue operating sleeve back to the left.

Our table equipment and cue extensions are made in the UK and are regularly seen being used on the TV by professionals during all major snooker tournaments.

The equipment is reliable and will help players to reach the longer shots sometimes required in match play. The rests should last many years if treated with the same respect afforded to your own cue but please avoid the following;

Do not over tighten the blue operating sleeve.

Do not close the shaft hard onto the blue operating sleeve.

After use return the rest to a safe place, preferably on table hooks

Do not drop or throw the rests onto the floor.
